Due to their significant tax incentives, flow-through shares purchased inside a limited partnership carry a low (or zero) adjusted cost base. This results in a capital gain for unitholders should the general partner sell a flow-through share from inside the partnership. The general partner will, on occasion, decrease or eliminate a holding from inside the partnership in order to lock in gains, manage liquidity constraints, or mitigate the impact of deteriorating fundamentals for a particular investment.

CMP 2009 and CMP 2009 II completed their tax-deferred rollover into Dynamic Managed Portfolios Ltd. on January 7, 2011 and were subsequently dissolved. Unitholders of CMP 2009 and CMP 2009 II received 57.8680 and 44.2018 shares of DMP Resource Class, respectively, for each partnership unit held. On the date of transfer, the net asset values per unit of CMP 2009 and CMP 2009 II were \$1,710.85 and \$1,306.81, respectively, and the net asset value per share of DMP Resource Class was \$29.56.

CMP is a pioneer in flow-through investing, with a history dating back to when flow-through shares were first introduced by the federal government. Since its creation in 1984, CMP has raised over \$2.7 billion in assets for the purpose of sponsoring exploration and development efforts across Canada.
